

## **ENFORSYS LTD WARRANT CANARY**

Existing and proposed laws, especially those related to the US Patriot Act, dictate the authority to issue secret warrants, searches and seizures of data from online users. These laws can cause criminal penalties for revealing the warrant, search or seizure, disallowing disclosure related to these events that would negatively affect users. The principals and employees of EnforSys LTD must comply with such warrants and their provisions for secrecy.

Due to these circumstances, EnforSys LTD stands prepared and will make available, on a monthly basis, a “warrant canary” in the form of a cryptographically signed message containing the following:

A declaration that states, up to the stated point of time, no warrants have been served, nor have any searches or seizures taken place. This will also include a pasted headline from a selected major news source, establishing and as a verification on the true date of issue. Special note should be taken if these messages ever cease being updated or are unchanged for more than thirty (30) days, or are removed from this page.

---

As of April 24th, 2020, ENFORSYS LTD has not received any National Security Letters or FISA court orders, and we have not been subject to any gag order(s) by a FISA court, or any other similar court(s) of any government. EnforSYS LTD has never placed any backdoors in our hardware or software and has not received any requests to do so. ENFORSYS LTD has never disclosed any user communications to any third party. No searches or seizures of any kind have ever been performed on ENFORSYS LTD assets.
